DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The preamble in Claims 25,27, and 28 should read "computer readable medium", as opposed to "computer program product".

Allowable Subject Matter

2. Claims 1-4,6,8-31 allowed.
3. The following is an examiner's statement of reasons for allowance: Claims 1-4,6,8-31 are allowable over the prior art of record because the Examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of the said prior art which teaches an image processing apparatus comprising: a scanner, a main body, wherein homing operation of the scanner is performed independently of the initializing process of the control section of the main body; wherein a warm-up of the main body is started upon confirmation of the homing operation of the scanner; and wherein when the control section of the main body confirms the completion of the homing operation, the control section of the main body supplies necessary data for making an automatic adjustment to the scanner, and the scanner

Art Unit: 2625

makes the automatic adjustment based on the data supplied from the control section of the main body, as taught in Claims 1-3, 12,15-17,19,29-31; and

a method for initializing an image processing apparatus comprising: performing a homing operation of the scanner independently of an initializing process of the main body; supplying necessary data for the making an automatic adjustment to the scanner, the necessary data being supplied by a control section of the main body to the scanner; and automatically adjusting the scanner based on the necessary data, when the control section of the main body confirms a completion of the homing operation of the scanner and starting warm-up when the main body confirms completion of the homing operation of the scanner, as taught in Claims 8-11, and

a computer readable medium including computer program instructions that cause a computer to implement a method of initializing an image processing apparatus having a main body for processing image information input by a scanner, comprising a first computer code for performing a homing operation of the scanner independently of an initializing process of the main body a second computer code for supplying necessary data for making an automatic adjustment to the scanner, and a third computer code for starting a warm-up of said main body, when the section of the main body confirms the completion of the homing operation of the scanner, as taught in Claims 22-28 including all of the features recited therein.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2625

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
